

Client Success Story

Efficiency Driver For Upgrade

ProScope is the perfect fit for a large, project orientated businesses such as DeepOcean who have particularly challenging project management needs.

**Dean Gardner, ProScope
Managing Director**

DEEPOCEAN

Business Challenges

- Global operation with onshore and offshore factors.
- Specialized expertise demands flexibility and efficiency.
- Varied and complex projects with extensive resource and asset allocations.
- Offline delays the transfer of detailed project data including operational stats.
- Inability to capture, monitor and maintain accurate billing as projects progress due to lack of real time data.

Solution

- Full integration with NetSuite.
- Offline capability to support data sharing in real time.
- Enhanced project controls to deal with project retentions and variations.
- Automation and streamlining of project processes including project resource and inventory.
- Exceptional project reporting to provide actionable insights.

Benefits

- Seamless integration across different departments around the globe onshore and offshore.
- Simplify complex financials including intercompany billing and charging.
- Provide dynamic reporting from the board room to the engine room of the project management, users at every level and in every location can access a single point of truth.
- Increase efficiency by satisfying the varying compliance and tax requirements.
- Minimizing downtime as resources can be aligned with specific project tasks.
